ENGINEERED FLOORING

# Heph Flooring

An outlook of Australia's most prestige and beloved species; Blackbutt, Spotted Gum, Nature's Blue Gum, Jarrah and Tasmanian Oak.

The timber flooring is manufactured with components that are the FSC certified, Australia/ New Zealand sourced pine as the core material and with the Australian hardwood as the wear layer. Thus creating a product high in quality and structurally stable. The Australian Prestige comprise of the 5g Välinge Click system and enables a simple installation method.

Australian Prestige utilises a 6 layer coat of lacquer cured by UV light, which is done through highly technological machinery application thus making it more durable and highly scratch and stain resistant.

-Blackbutt-

-Spotted Gum-

-Nature's Blue Gum-

-Jarrah-

-Tasmanian Oak-

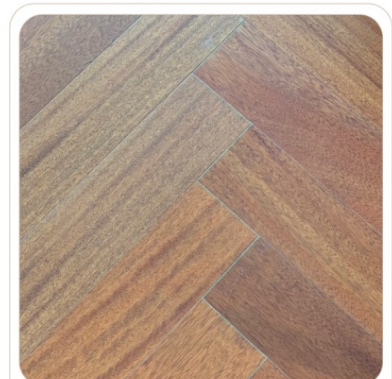

-Merbau-

-White Oak-

-Maple-

-Herringbone-

\* All other species are available on request

# Flooring Specification
