American White Oak

American white oak is the trade name for a variety of hardwood species from the Quercus genus. The name 'white oak' encompasses numerous species, eight of which are commercially available as timber. Very similar in appearance and colour to the European oak, American white oak has light-coloured sapwood and a light to dark brown heartwood. White oak is mostly straight grained with a medium to coarse texture, with longer rays. It has large distinctive growth rings, and some medullary rays may be present. American white oak is durable in its strength and resistance to decay. It readily accepts stains and polishes to a good finish. American white Oak flooring offering a warmth and nature beauty, no matter of your design is classic style or modern style.

Specifications

| | |
|--------------------------------------|--|
| Botanical Name : | Quercus alba, Oak, American white oak |
| Species : | White Oak |
| Colour : | Light to medium brown |
| Grain : | Coarse, uneven texture with a straight grain |
| Grade Standard : | ABCD |
| Thickness (mm) : | 3 / 13.5 |
| Width (mm) : | 192 |
| Length (mm) : | 1820 / 2130 |
| Finish : | Stained |
| Surface : | Stained Smooth / Brushed |
| Edges : | Square |
| Profile : | 5G |
| Packaging : | 6 pieces per pack |
| Properties Hardness / Janka : | 5.9 kN |
| Average Dry Density : | 750kg/m ³ |
| Formaldehyde Emissions : | European E1 standard |
| Coating : | Pre-finished, water based robust 6 Layers of UV cured acrylic lacquer, making them more durable, highly scratch and stains resistance. |
| Hardwood Origins : | USA/ Europe |
